Appointment for a Psychiatric evaluation/consultation

A consulting Psychiatrist and Psychiatric Nurse Practitioner are available for consultations to diagnose and to determine whether a student may benefit from adding a medication as part of a treatment plan. These appointments are made through the Counseling Center and are generally based on a referral from one of their staff members and take place at their location in Conant House. On occasion referrals may come from a Health Center provider or a provider from home and the student is often encouraged to speak to someone at the counseling center initially.
