Tyler Peters  
Geochemistry and zircon geochronology of ocelli-bearing amphibolites, Isua Greenstone Belt, Greenland  
Advisor: William Peck

Joshua Solomon  
Analysis of 2012-2013 Sediment Traps in Linnédalen, Spitsbergen: Implications for Varve Formation and Paleoclimate Interpretation  
Advisor: Bruce Selleck

John Gabler  
Field gamma ray signatures and sedimentary facies sequences, Trenton Group and Utica Formation, New York and Ontario  
Advisor: Bruce Selleck

Christopher Guiney  
Organic carbon vs. carbonate stable isotope signatures in the upper Trenton: Evidence for closed-basin productivity?  
Advisor: Bruce Selleck

Nicholas Jones  
Fracture Analysis in Ordovician Utica Shale, Mohawk Valley, NY  
Advisor: Martin Wong

Rachel Walsh  
Bedding-Parallel Carbonate Veins of the Ordovician Trenton Group and Associated Utica Formation in New York State  
Advisor: Bruce Selleck

Allegra Bianchini  
Reconstructing Holocene paleoclimate in the Gerlache Strait, west Antarctic Peninsula  
Advisor: Amy Leventer

Joshua Lasker  
Tracing the origin of the zinc-lead orebody through fluid analysis at the Old Hope massive sulfide deposit, Kintyre Jamaica  
Advisor: William Peck

Megan Switzer  
Inflated Pahoehoe Lava: A petrographic and geochemical analysis of the McCartys flow  
Advisor: Karen Harpp

Andrew Kingsley  
The Distribution of Deicing Salts in Near-road Soils in Hamilton, NY  
Advisor: Rich April

Joshua Riefler  
XRD and SEM Analysis of Silurian Megalodont Bivalve Deposits in Alaska's Alexander Terrane  
Advisor: Connie Soja

Emily Butler  
Stable Isotope Signature of Ordovician Seawater from Trenton Group Brachiopods, Mohawk Valley, New York State and Prince Edward Peninsula, Ontario  
Advisor: Bruce Selleck

Samuel Brennan  
Hydrocarbon Migration and Cement Variability in the Trenton Group  
Advisor: Bruce Selleck

Anay Shah  
Clay Mineralogy and Burial History of the Trenton Group and Utica Formation, Northern Appalachian Basin  
Advisor: Bruce Selleck
